

BRINGING YOU WHAT'S NEXT.™

COLORING BOOK

CUSTOMERS TURN TO FS FOR NEXT-GENERATION AGRONOMY, ENERGY AND GRAIN SYSTEMS SOLUTIONS.

FS teams utilize cloud-based information technology, while providing crop inputs and fuel management tools.

FS facilities are strategically located to provide efficient service and support. Each FS company is locally-owned, which means they share a personal interest in the customers and communities they serve.

To learn more about FS companies, products and services, visit fssystem.com.

FS Specialists utilize the very latest digital technology to provide forward-thinking industry recommendations and data-driven projections.

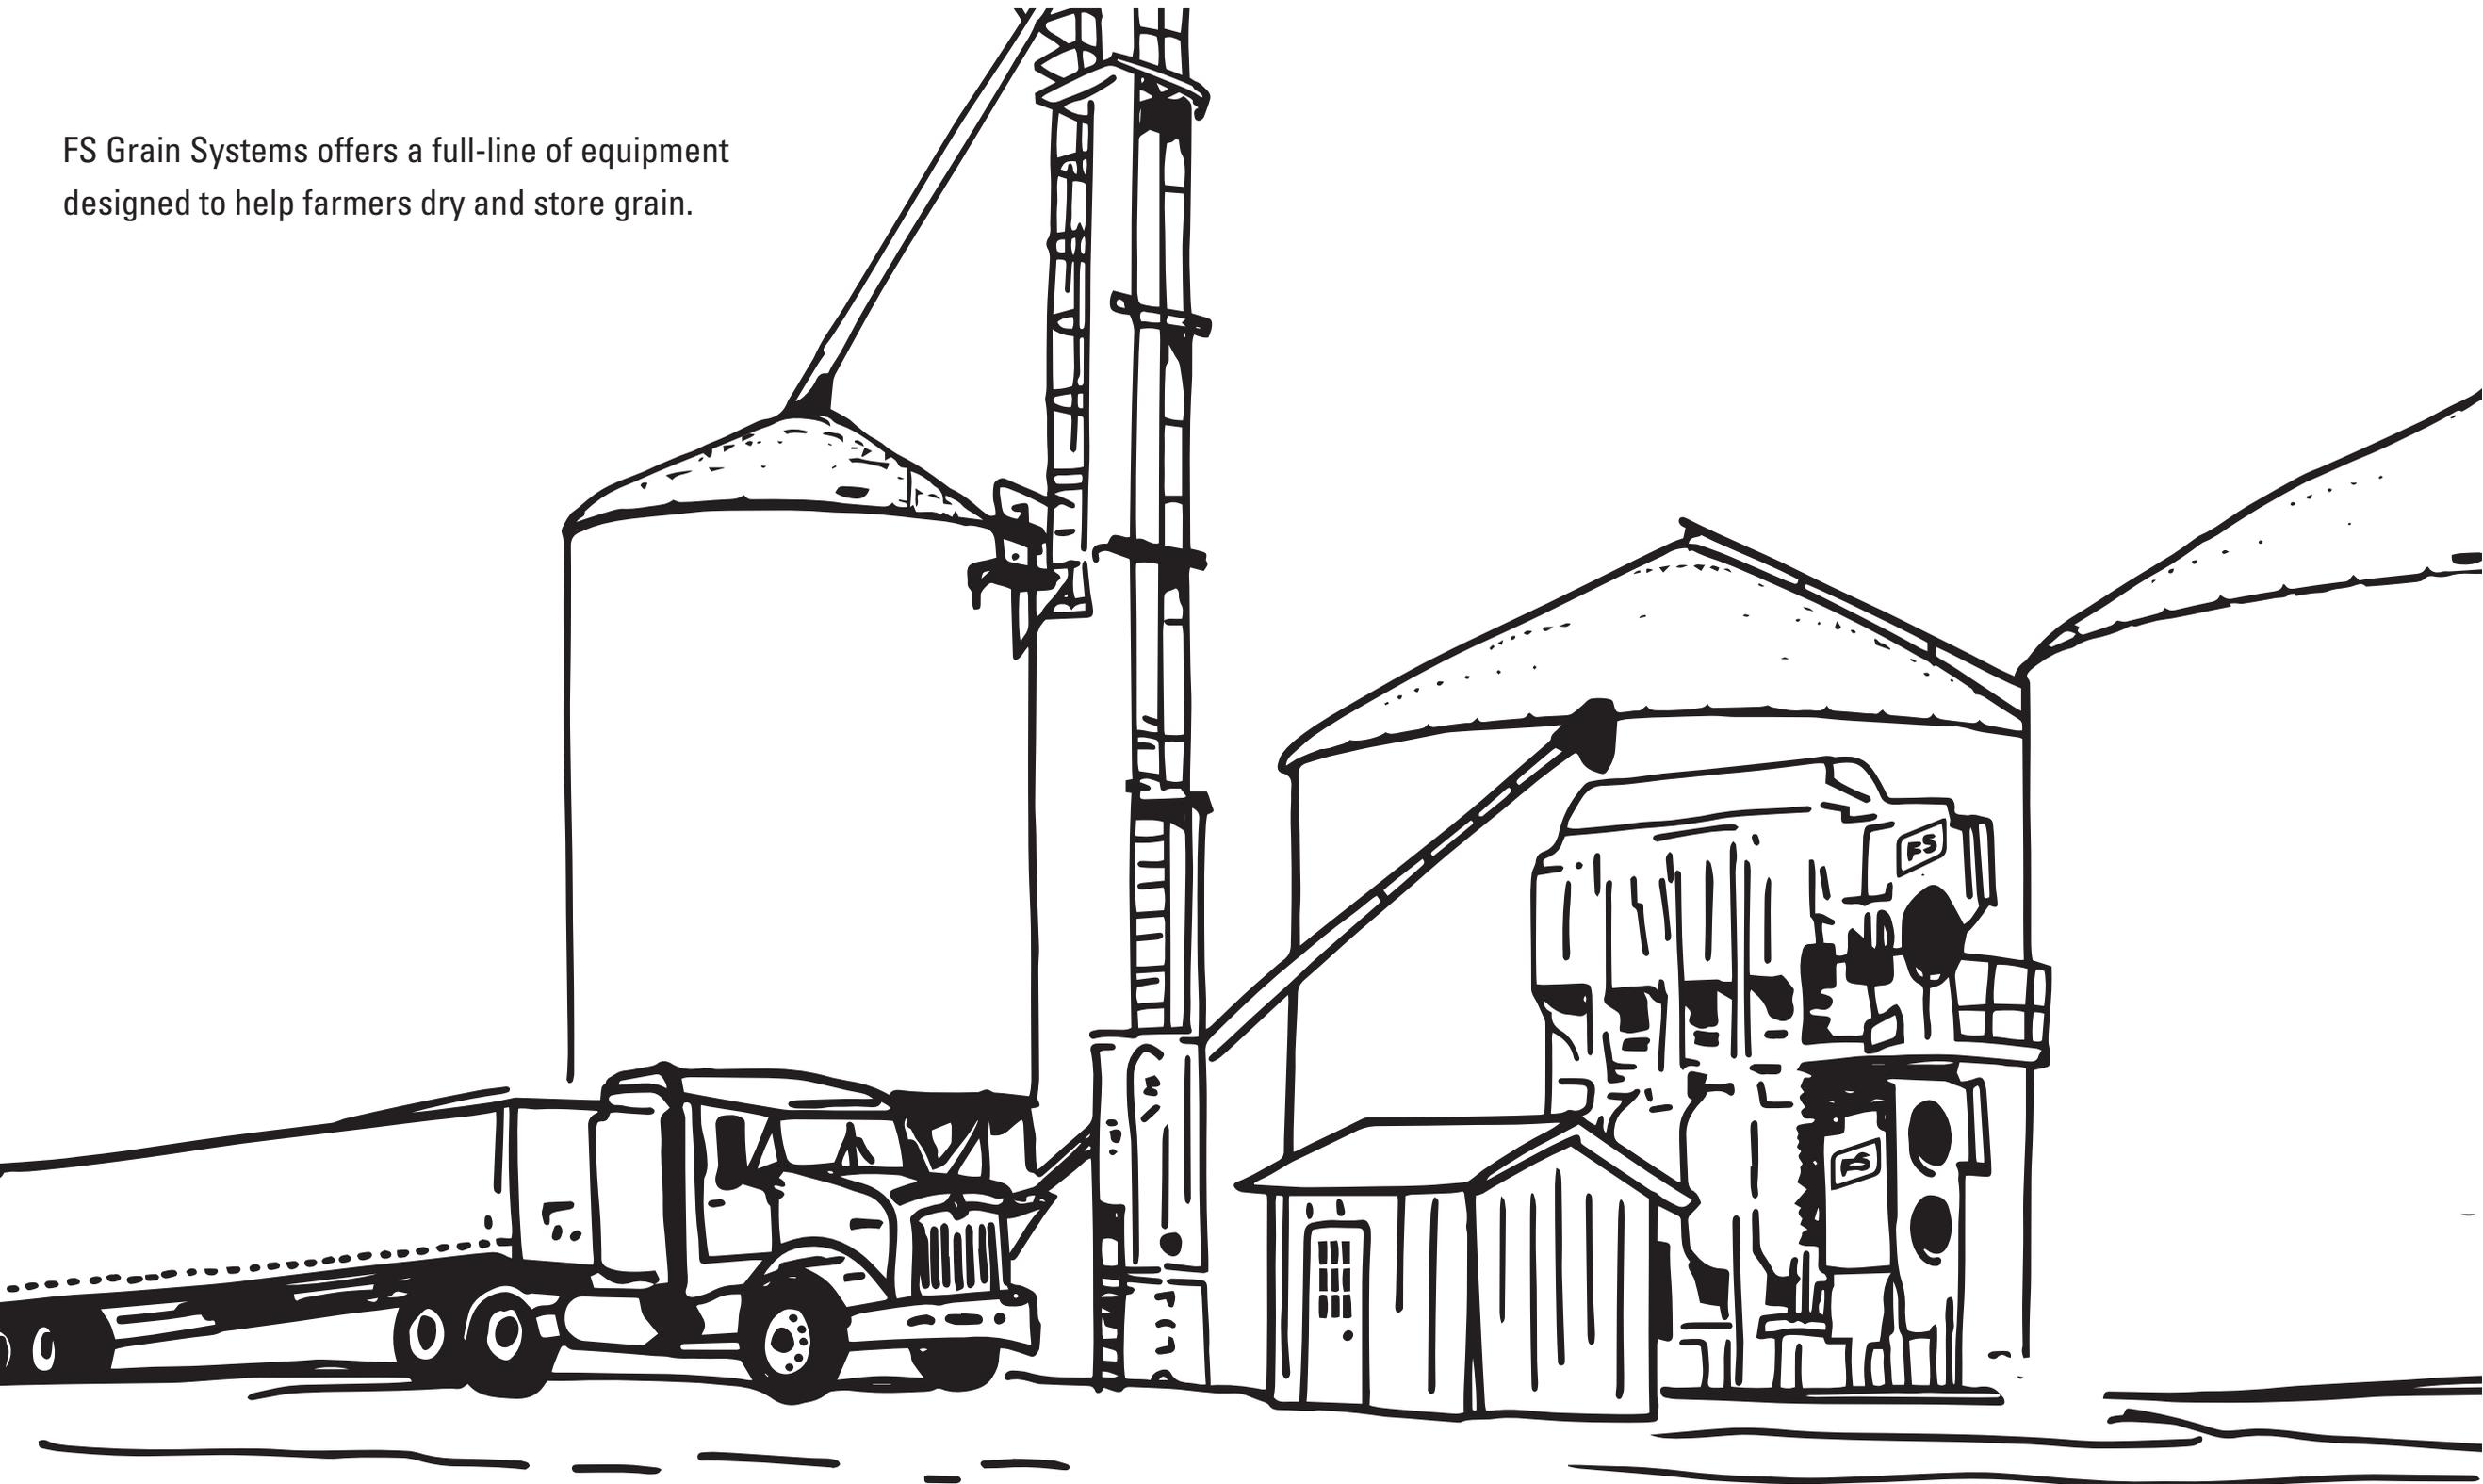

FS Agronomists help growers maximize every acre by using science-based, profit-supporting agronomy that honors environmental stewardship.

FS Crop Specialists offer seed solutions and expert recommendations tailored to each grower's fields.

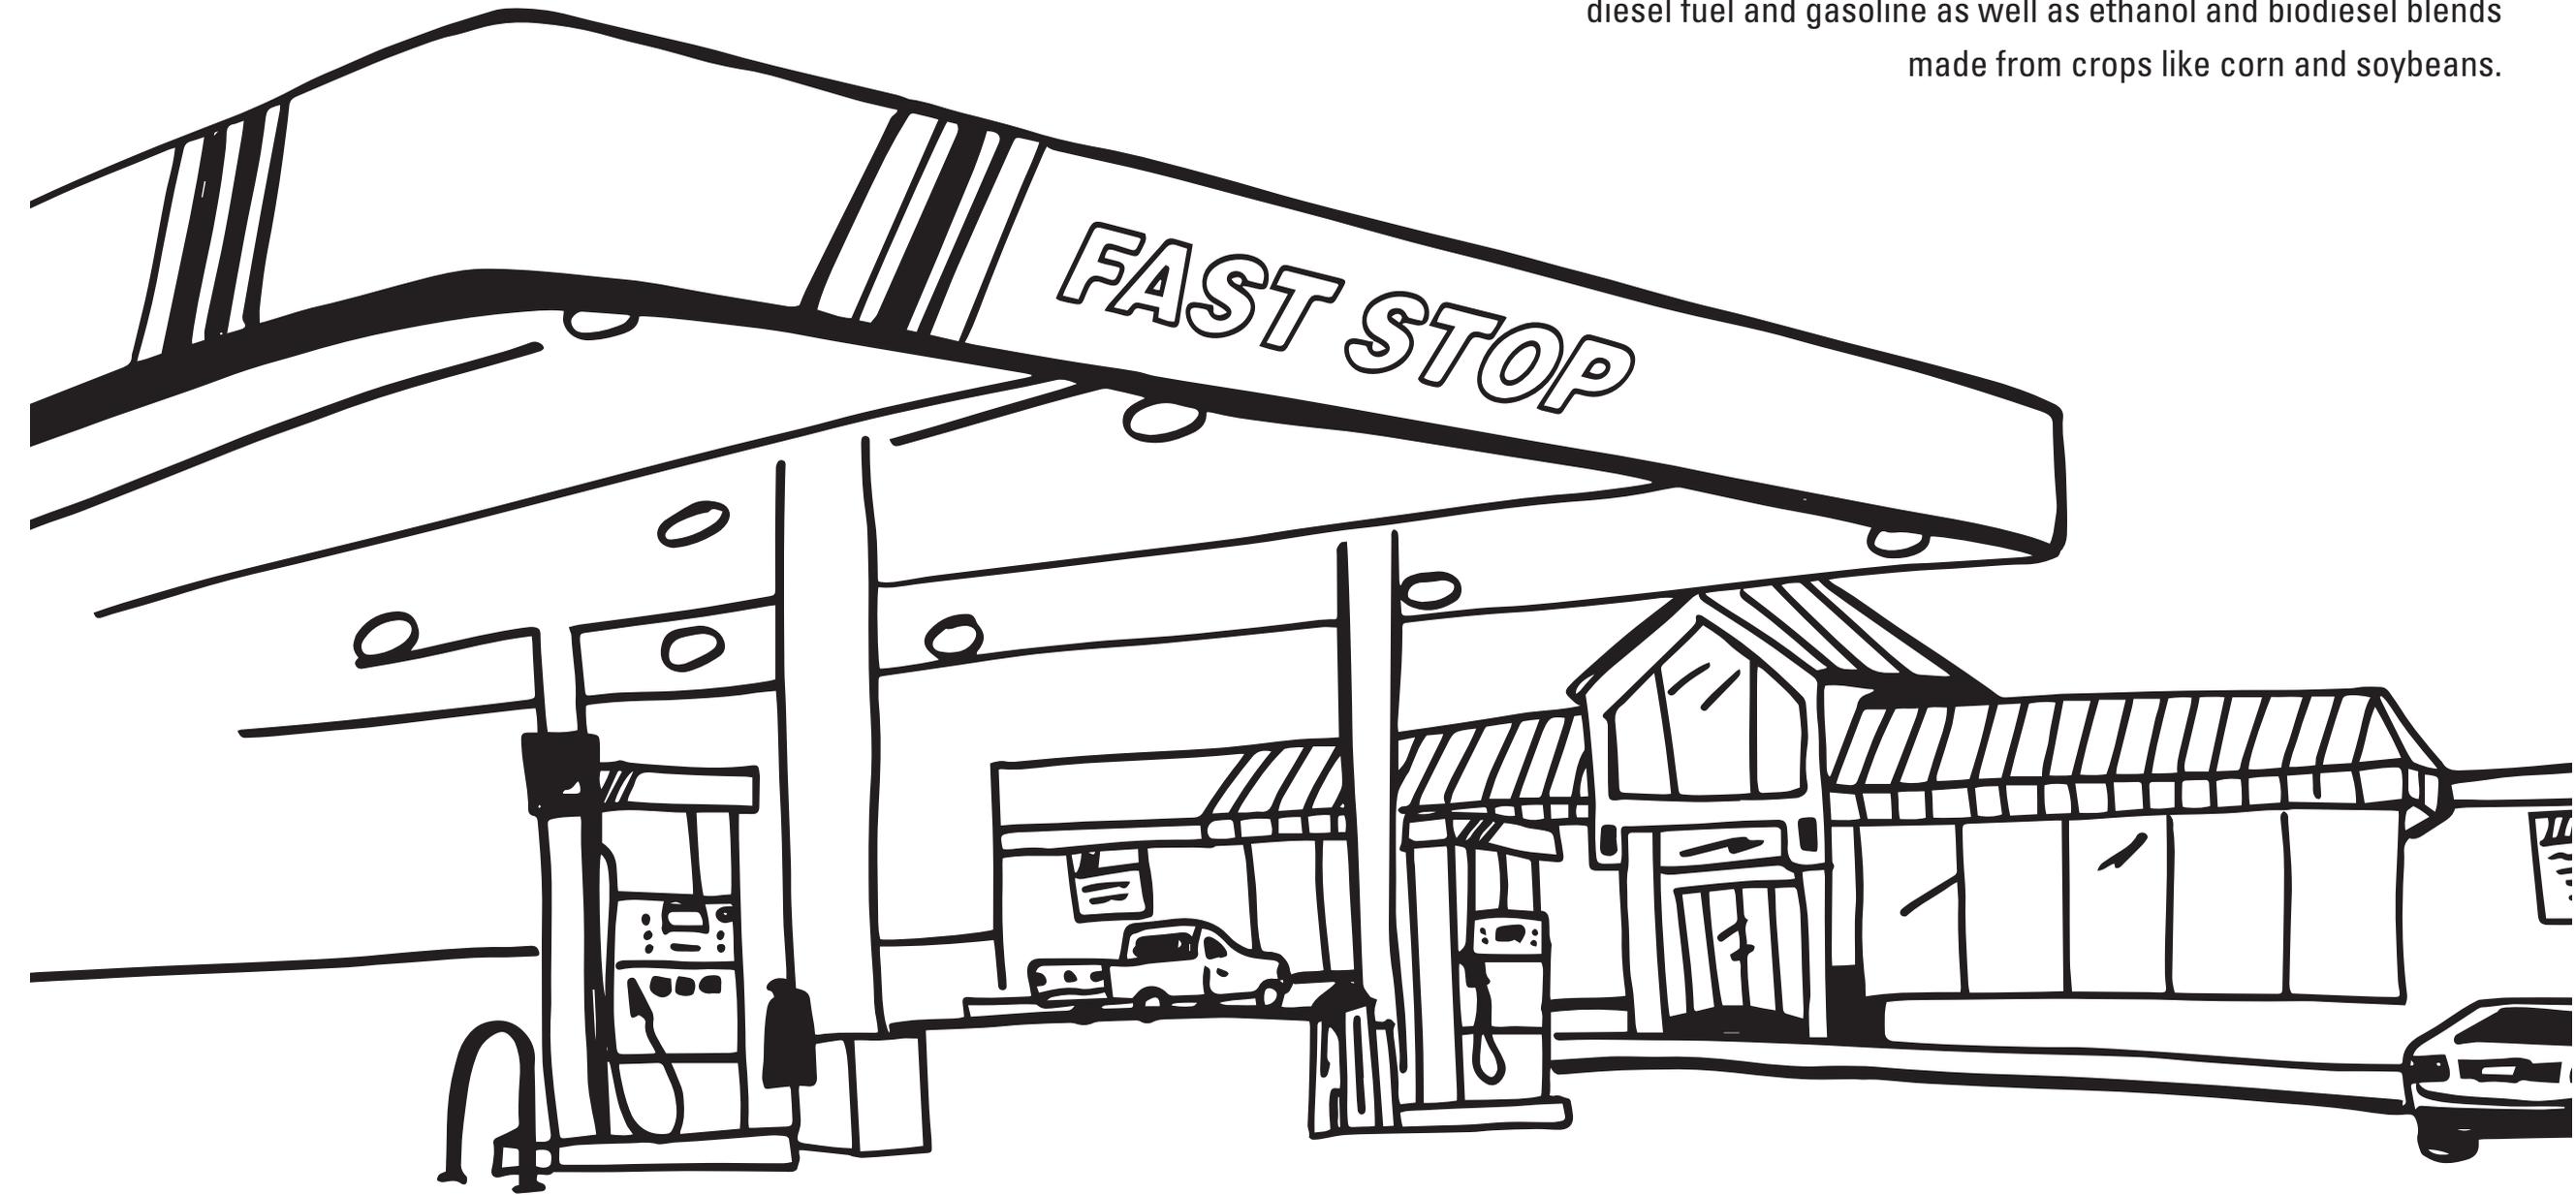

FS Grain Systems offers a full-line of equipment designed to help farmers dry and store grain.

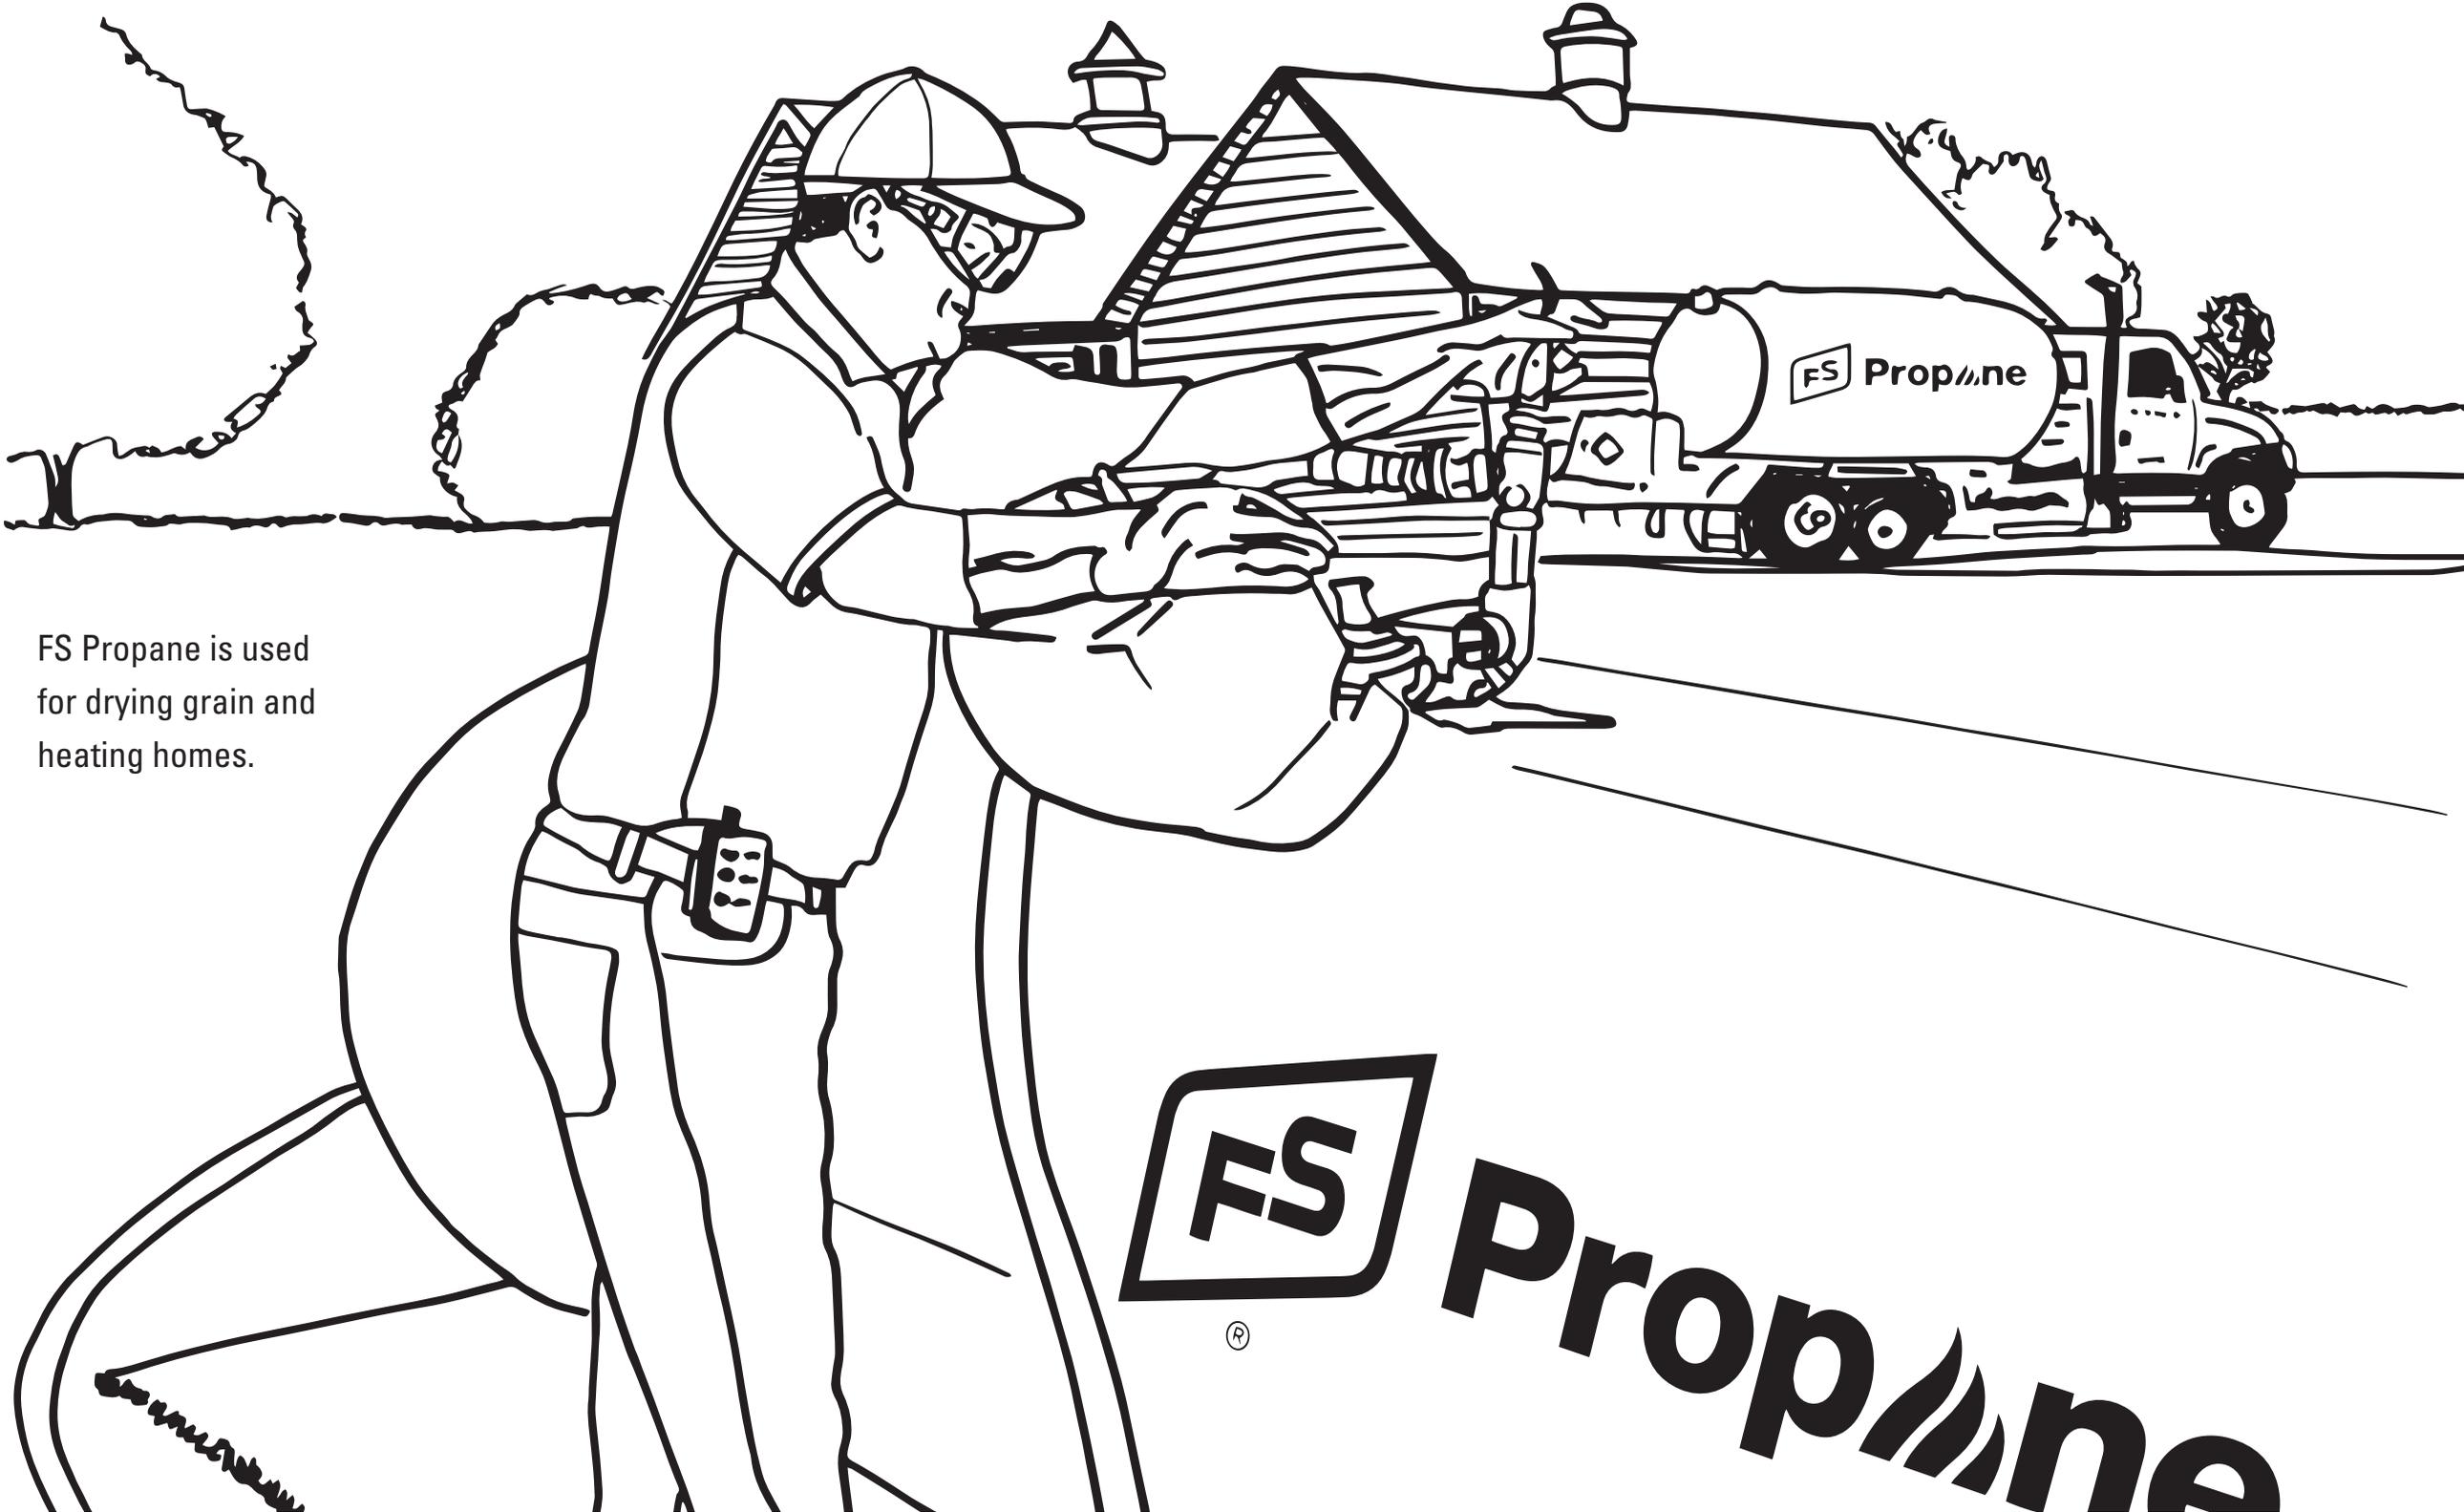

FS Energy Specialists
recommend fuels and
lubricants used in cars,
trucks, tractors
and combines.

FS FAST STOP® and FS FAST STOP® Express locations offer quality diesel fuel and gasoline as well as ethanol and biodiesel blends made from crops like corn and soybeans.

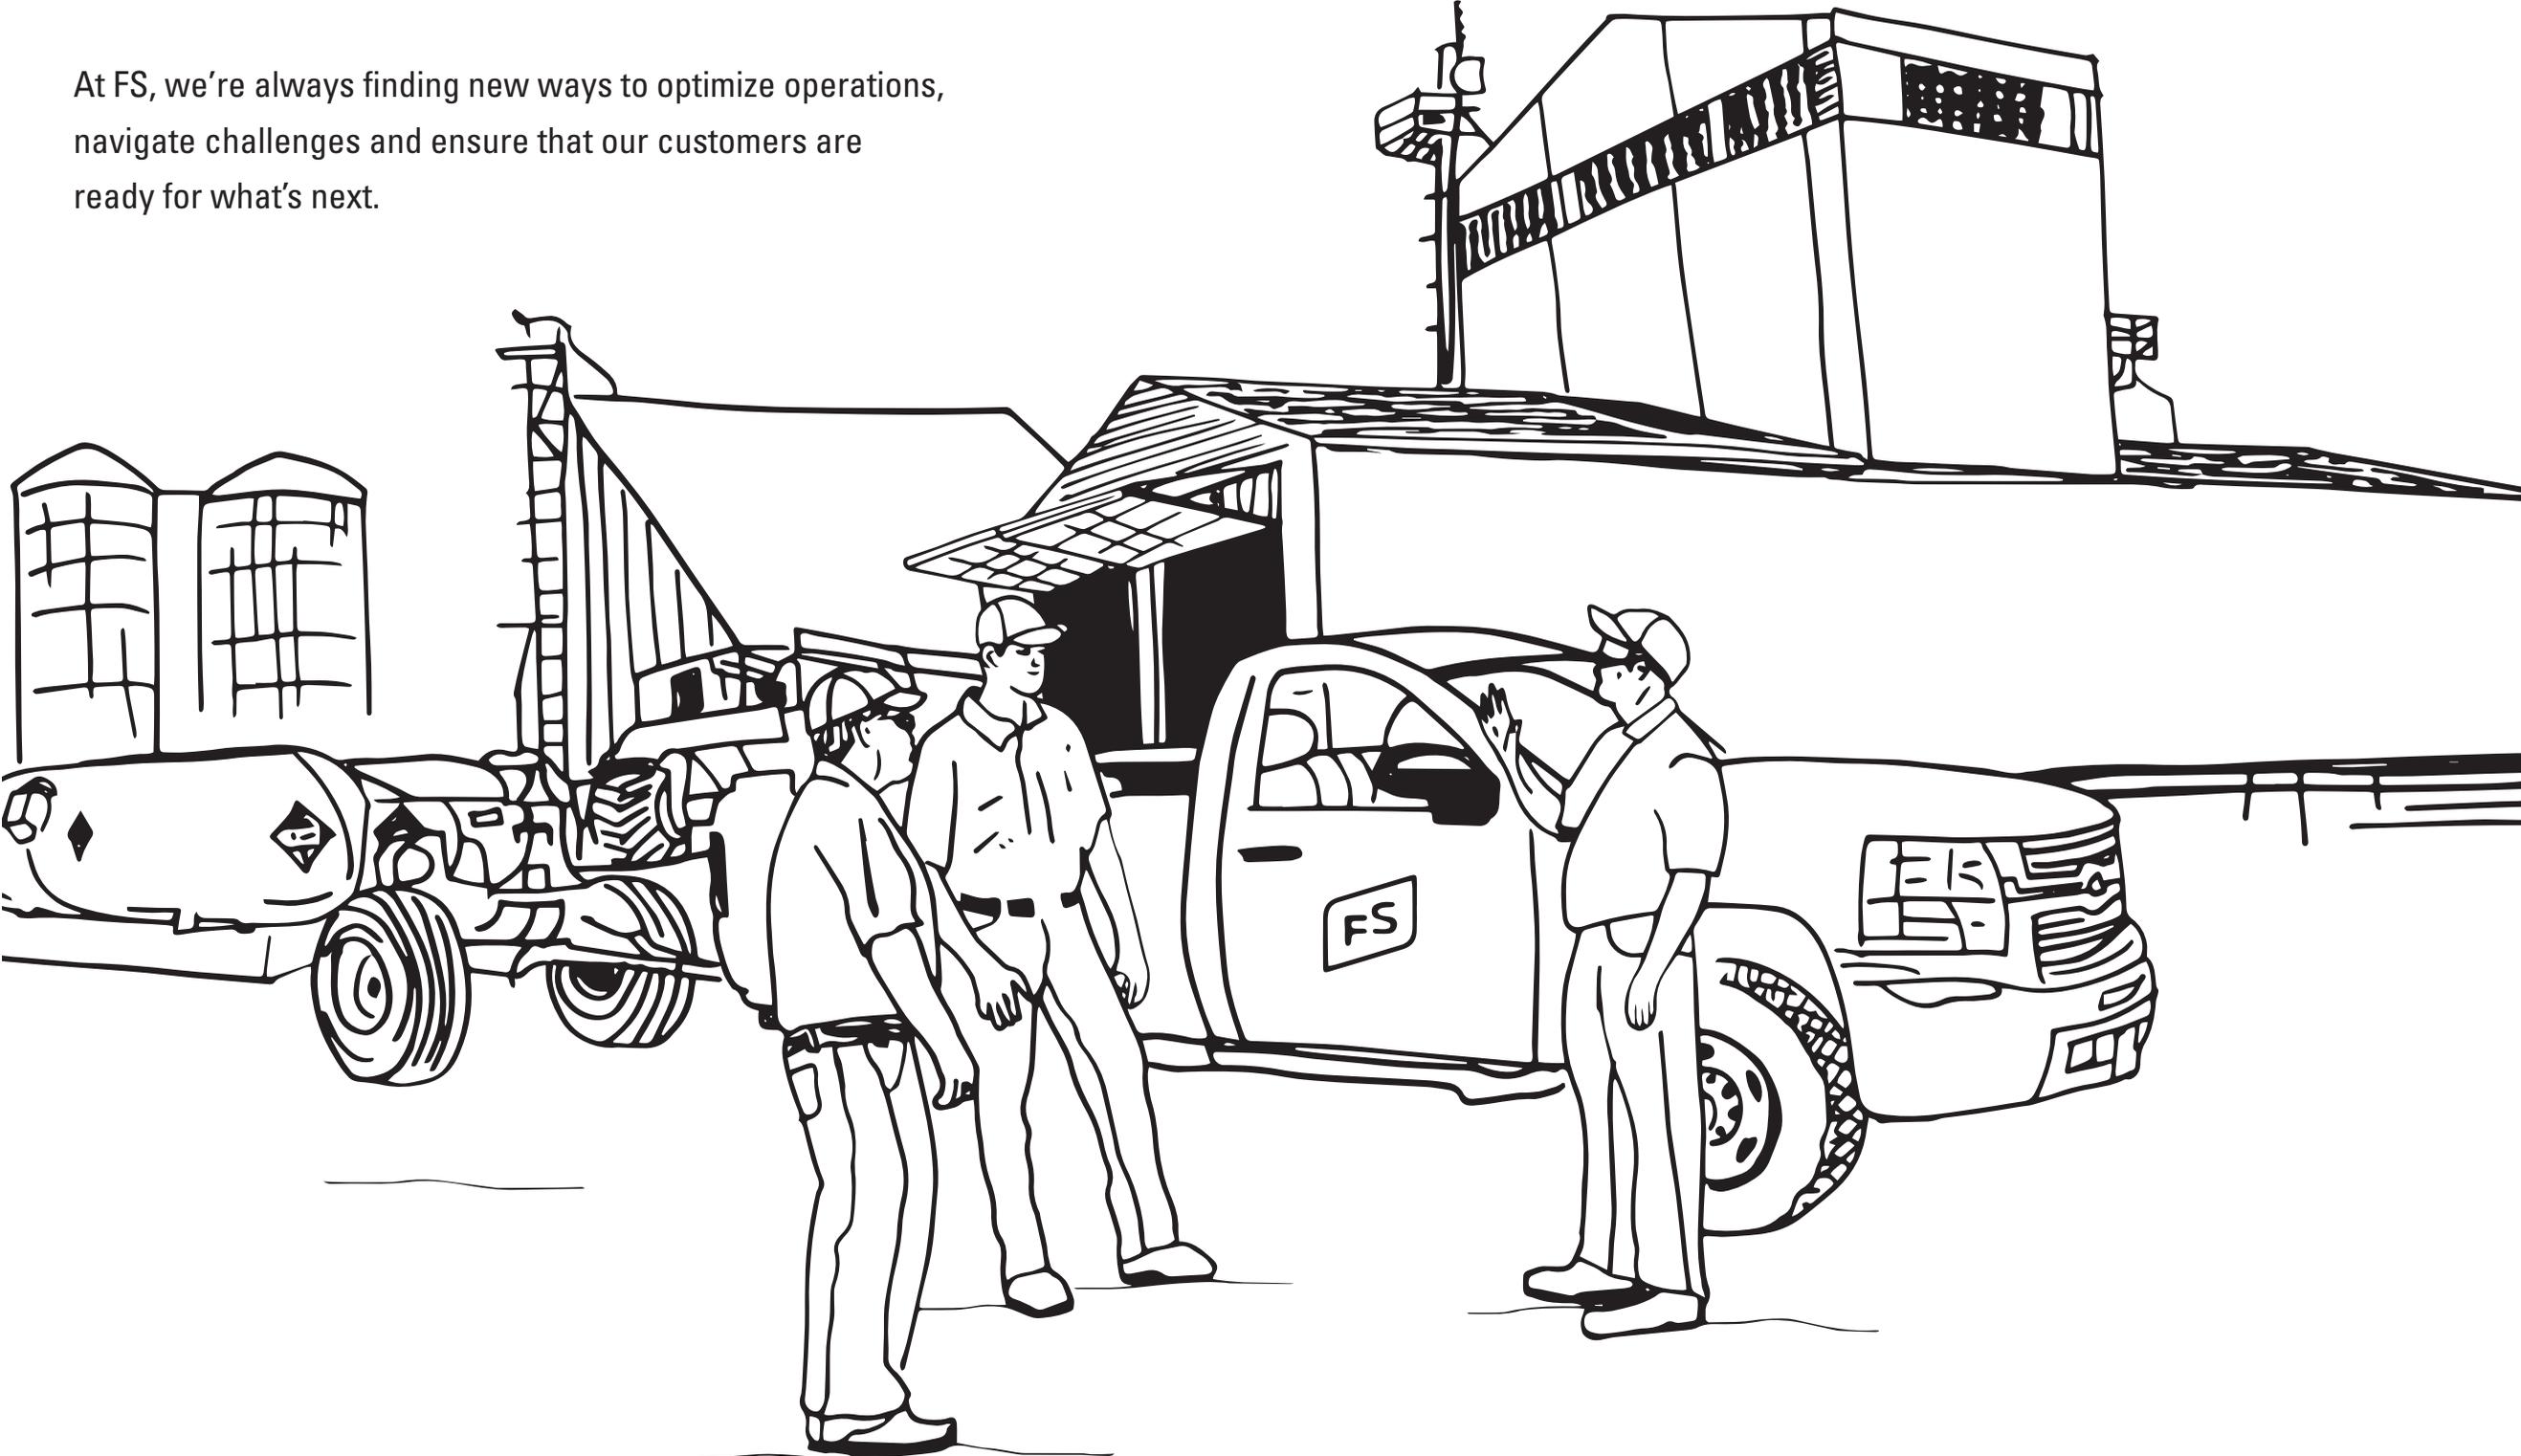

FS Propane is used
for drying grain and
heating homes.

FS
Propane

FS Propane Autogas
is a clean, alternative fuel
that can be used in cars,
trucks and buses.

At FS, we're always finding new ways to optimize operations, navigate challenges and ensure that our customers are ready for what's next.
